Studies of Lead Administration and Elimination in Adult Volunteers under Natural and Experimentally Induced Conditions over Extended Periods of Time (Robert A. Kehoe)

Foreword	425
Preface	427
Introduction	429
Chapter 1. Preliminary remarks	431
Background to the experiments	431
Natural body burden of lead	431
Overview	432
Use of humans as subjects	432
Overview of the ingestion experiments	434
Overview of the inhalation experiments	434
Identification of experimental unknowns and sources of error	435
Chapter 2. The ingestion of lead by healthy human subjects	439
Ingestion experiment 1	439
Ingestion experiment 2	444
Ingestion experiment 3	447
Ingestion experiment 4	448
Discussion and results of ingestion experiments 1–4	450
Chapter 3. The inhalation of particulate lead by healthy human subjects	455
General considerations	455

The respiratory chamber 455
Development 455
Structure and operation of the respiratory chamber 456
Additional features of the chambers 457
General protocol of the inhalation experiments 458
Inhalation experiments 1 and 2 465
Inhalation experiment 3 470
Inhalation experiments 4–7 472
Summary and results of experiments 1–7 472
Inhalation experiments 8–10 473
Inhalation experiments 11 and 12 478
Inhalation experiment 13 479
Summary and conclusions of the lead inhalation experiments 480
Chapter 4. Summation and overall conclusions 489
